Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 May 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Carter et al.

Carter et al shows a fluid product dispenser comprising all the featured elements of the instant invention, note specifically tank12 with venting passage 26; actuator button 46; pierced membrane 18; vibration means 56; and inlet valve 104.

As to claim 3, note the inlet valve disclosed in col. 7, lines 41-62.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carter et al.

Carter et al shows a fluid product dispenser comprising all the featured elements of the instant invention except for the venting passage 26 having a part made of porous material. It is well known to provide porous material for air inlet vents to act as a filter and remove any

contaminants in the air. Morane et al shows an atomizer having an air venting ports 5 with a part 121 made of porous material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a porous material for the venting port of Carter et al, as taught by Morane et al, since with such a modification the porous material would act as a filter for the air penetrating the tank and would remove any particles or impurities from entering the tank.

Allowable Subject Matter

5. Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

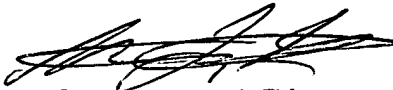

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Corbaz, Ross et al, Ivri, Chen and Babaev show various types of gravity fed vibrating atomizers.
